Forecast for Friday 01 Oct 2021

Weather: Often cloudy with frequent showers or longer spells of rain, these briefly heavy with a chance of hail and thunder. Showers will fall as snow above 1000 metres. Some drier and brighter interludes too.

Chance of cloud free mountain/hill tops above 800m: 60%

Visibility: Poor in areas of low down to 600 metres as showers pass by, this may become more extensive from mid-afternoon onwards for a time. Otherwise very good visibility with good air clarity. Quickly dropping poor in any higher summit snow.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Be prepared for winter like conditions on the highest tops with significant wind chill, snow and gales making for hazardous conditions at times. Drenching conditions also possible at lower elevations as showers pass by, especially in the west of the area.

Forecast for Saturday 02 Oct 2021

Weather: Low confidence for detail. A generally dry start but showers or widespread rain may spread north in the afternoon and evening. Perhaps some wet snow on the highest tops at first, and feeling cold at lower levels too.

Maximum wind: Southerly winds gusting to 50 mph on the summits

Chance of cloud free mountain/hill tops above 800m: 50%

Visibility: Poor in areas of cloud down to 700 metres across the south of the region, otherwise good visibility likely in the far north where less in the way of cloud is expected.

Temperature: **Glens:** Plus 2 rising to 10 Celsius
At 800m: Plus 5 Celsius
Freezing level: 1200 metres, rising above summits in the afternoon
